Get your free COVID-19 vaccination today in Dandenong

Who is due for a COVID-19 vaccine

- COVID-19 vaccines are available to everyone aged 5 years and over in Australia.
- If you are **16 years or older** AND you had your **second primary dose** (or third primary dose if severely immunocompromised) of COVID-19 vaccine **3 months ago**, you are due for your free booster.
- An **additional winter booster dose** of COVID-19 vaccine is available for people at greatest risk who have had their first booster dose. These groups include:
    - adults aged 65 years and older
    - residents of aged care or disability care facilities
    - people aged 16 years and older who are severely immunocompromised
    - Aboriginal and Torres Strait Islander people aged 50 years and older.

Eligible people can receive their winter dose 4 months after receiving their third dose, or from four months after having COVID-19 if infection has occurred since the person's third dose (or fourth dose for people who received a three-dose primary course).

Benefits of a COVID-19 vaccine booster

- Maximum protection against COVID-19
- Reduce risk of severe illness and hospitalisation from COVID-19
- Help prevent spreading COVID-19 to your family and friends

Information for people who have tested positive for COVID-19

If you have **tested positive for COVID-19**, it is recommended that you **wait 3 months** from confirmed infection before receiving your **next COVID-19 vaccine dose** (including primary and booster doses).

The next scheduled dose should then be given as soon as possible after this period.
