- [Download flyer here](#)

Flu vaccine vital this year

Influenza vaccination is particularly important this year. With the easing of international and domestic public health measures arising from the COVID-19 global pandemic, a resurgence of influenza is occurring in 2022. For those who catch the flu, it can result in serious illness. Annual influenza vaccination is recommended for all people aged 6 months and over and is the best defence against the flu, helping prevent both severe illness and from spreading it to your loved ones. To get your flu vaccine today, call your local GP clinic or pharmacy. Stay up-to-date at sephu.org
